

AMENDMENTS TO THE SPECIFICATION

Please add the following paragraph to page 23 of the specification of the currently pending application immediately before the paragraph beginning on line 20 of that page:

A song accumulates points by visitors expressing their numerical selections for the three category variables. Points will be accumulated and tabulated using the following formula:

$$(\text{Familiarity}) + (\text{Passion}) - (\text{Burn}) = \text{Total points.}$$

For example, a person indicating a 10 for both Familiarity and Passion and a 1 for Burn would generate for that song a point total of 19. The sum of all votes for this song would provide the Total Points accumulated.
